General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JANUARY 1985

Issued May 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the **44 agreement categories** of cotton textiles, the **25 categories** of wool textiles, and the **44 categories** of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

February 1985

Issued May 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

GUIDE TO
FOREIGN TRADE
STATISTICS
1983

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

Make your work or study easy
...fast...and accurate! Use the
"Guide to Foreign Trade Sta-
tistics: 1983"

guide to foreign trade statistics: 1983

Exports...imports...whatever you wish to know concern-
ing foreign trade — the "Guide" offers you the most
convenient way to find the facts. The foreign trade sta-
tistics program, conducted by the Bureau of the Census,
involves the compilation and dissemination of thousands
of facts relating to imports and exports of the United
States. These statistics are designed to serve the needs of
both Government and non-Government users who have
wide ranges of interests and a variety of reasons for re-
quiring information on foreign trade. The "Guide to
Foreign Trade Statistics" includes the listings of data
presented in many different arrangements and released
in the form of reports available by subscription and in re-
ports and machine tabulations, magnetic tapes, and micro-
fiche offered for public reference use. Up-to-date reports
and special tabulations listed show current plans for the
release of foreign trade statistical data through 1983.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

MARCH 1985

Issued June 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the **44 agreement categories** of cotton textiles, the **25 categories** of wool textiles, and the **44 categories** of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

1983

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1983.

Send order form to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

S/N 003-024-05766-2

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

APRIL 1985

Issued June 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

GUIDE TO
FOREIGN TRADE
STATISTICS

1983

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

Make your work or study easy
...fast...and accurate! Use the
"Guide to Foreign Trade Sta-
tistics: 1983"

guide to foreign trade statistics: 1983

Exports...imports...whatever you wish to know concern-
ing foreign trade — the "Guide" offers you the most
convenient way to find the facts. The foreign trade sta-
tistics program, conducted by the Bureau of the Census,
involves the compilation and dissemination of thousands
of facts relating to imports and exports of the United
States. These statistics are designed to serve the needs of
both Government and non-Government users who have
wide ranges of interests and a variety of reasons for re-
quiring information on foreign trade. The "Guide to
Foreign Trade Statistics" includes the listings of data
presented in many different arrangements and released
in the form of reports available by subscription and in re-
ports and machine tabulations, magnetic tapes, and micro-
fiche offered for public reference use. Up-to-date reports
and special tabulations listed show current plans for the
release of foreign trade statistical data through 1983.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

MAY 1985

Issued July 1985

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 44 agreement categories of cotton textiles, the 25 categories of wool textiles, and the 44 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

The month of importation for import statistics reflects the month in which the U.S. Customs Service releases the merchandise to the importer. Under this definition of statistical month, a small carryover exists. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are

errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports and Imports for Consumption, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 113 commodity categories of cotton, wool, and manmade fiber manufactures)

**Make your work or study easy
...fast...and accurate! Use the
"Guide to Foreign Trade Sta-
tistics: 1983"**

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1983.

Send order form to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the **44 agreement categories** of cotton textiles, the **25 categories** of wool textiles, and the **44 categories** of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SFT	Square Feet
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department
of Commerce
BUREAU OF
THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription \$22.00 (\$27.50 for foreign mailing), single issue \$3.00 (\$3.75 for foreign mailing).
